CORE COMPETENCIES

Full-Stack Development | API Design & Integration | SQL Data Modeling | Authentication & RBAC | E-commerce Workflows | Deployment Workflows | Agile/Scrum | Technical Documentation

PROFESSIONAL PROFILE

Software Engineer and Full Stack Developer with 3+ years of hands-on experience building web platforms, e-commerce adaptations, internal tools and database-driven software. Experienced with React, Vite, TypeScript, Node.js, Express, MySQL, Sequelize, Shopify Liquid, Git/GitHub and agile delivery practices.

My work focuses on reusable frontend components, backend API integration, SQL data models, authentication flows, role-based access, environment configuration and deployment-ready software solutions.

WORK EXPERIENCE

Full Stack Developer — Brand Me

September 2023 – Present

- Started my professional software development journey while completing my Software Engineering studies, working on real client projects, production websites and agile delivery workflows.
- Developed and maintained custom websites using HTML, CSS, JavaScript, Shopify Liquid and Git.
- Built and adapted landing pages, e-commerce storefront sections, forms and client-facing web components based on business requirements.
- Participated in client meetings, weekly deliveries and iterative development cycles, strengthening communication, problem-solving and delivery discipline.
- Contributed to complete web solutions with database integration and production-ready implementation.

Team Leader / Full Stack Developer — SHC

January 2026 – Present

- Led a full-stack split-hosting architecture using React, Vite, TypeScript, Node.js, Express, MySQL and Sequelize.
- Managed frontend/backend integration across separate domains, including CORS, environment variables, public URL contracts and deployment consistency.
- Drove refactor workstreams for authentication, role-based navigation, core modules and backend integrations.
- Established team engineering practices including main/develop workflow, pull request expectations and source-vs-build release organization.
- Improved application stability and security through API health validation, environment alignment, security headers, rate limiting and hardened authentication flows.

SELECTED TECHNICAL PROJECTS

Freelance and personal projects

2024–Present

- Built portfolio-grade full-stack applications focused on SaaS operations, service management, e-commerce workflows, analytics dashboards and database-driven business tools.
- Developed frontend interfaces with React, Vite, TypeScript and Tailwind CSS, using reusable components, responsive layouts, validated forms, dashboard views and client-facing workflows.
- Built backend APIs with Node.js, Express, MySQL and Sequelize, including REST endpoints, relational data models, authentication flows, role-based access control, filters and reporting features.
- Structured projects with clean folder organization, environment configuration, Git/GitHub version control, seed data, documentation and production ready setup

EDUCATION

Software Engineering, Web Development Specialization | University of Colima | 2021–2026

COURSES AND CERTIFICATIONS

Python — Cisco — September 2025

JavaScript — Cisco — January 2025

HTML — Cisco — May 2025

Full Stack Bootcamp — Coderfy — July 2024

PROFESSIONAL SKILLS

Effective communication | Teamwork | Analytical thinking | Attention to detail | Quick learner | Responsibility | Agile collaboration | Problem solving

LANGUAGES

English B2 — English Language Diploma — Instituto Tecnológico y de Estudios Superiores de Monterrey — 2025

TECHNICAL STACK

TypeScript, JavaScript, React, Next.js, Vite, Node.js, Zod, Express, MySQL, PostgreSQL, Sequelize, Tailwind CSS, TanStack Query, REST APIs, JWT Authentication, RBAC, Docker, GitHub Actions, Testing, OpenAPI/Swagger, Shopify Liquid, Git, GitHub, Agile/Scrum.
